Our World and Ourselves

A SERIES of geographies written with the aim of helping young people to visualize, realize, and understand the world in which they live.

THERE is no "special pleading" in these books. No one method or point of view is followed to the exclusion of all others, and neither the human, industrial, or regional treatment of a country is over-emphasized.

THE striking excellence of the pictures—their variety, freshness, and human interest—together with the large number of beautiful maps and the up-to-date teaching aids contribute to the outstanding quality of this series.

Book One OUR NEIGHBORS NEAR AND FAR *(Carpenter)*.....$0.96
Book Two OUR HOME STATE AND CONTINENT *(Brigham and McFarlane)*.... 1.32
Book Three OUR CONTINENTAL NEIGHBORS *(Brigham and McFarlane)*..... 1.52

AN IMPORTANT NEW BOOK

giving, for the first time, a comprehensive, authentic picture of Chinese cultural and physical life and problems based on a detailed survey of geographic regions.

China's Geographic Foundations

by GEORGE B. CRESSEY

Chairman, Department of Geology and Geography, Syracuse University

436 pages, 6 x 9, fully illustrated. $4.00

An interpretation of the adjustments which the Chinese have made to their environment. It portrays the varied characteristics of China's cultural and physical life and problems against a background of history, topography, climate, agriculture, natural resources and foreign trade. The book gives the first survey of China by detailed geographic regions, supported by the latest and most authentic data, much of it never before available. A striking feature of the text is the wealth of photographs supplemented by new, accurate maps and diagrams.
